Welcome to my portfolio

MARY WANGECHI
WEB DEVELOPER

## ABOUT ME

Hey there! I'm Mary Wangechi Kimaru, a passionate software engineering student currently embarking on my professional journey through an attachment program. I have a fervent curiosity for technology and a drive to create innovative solutions that make a difference in people's lives. A passionate web developer,currently pursuing a Bachelor's Degree in Software Engineering in Kirinyaga University. Currently, I'm immersed in my attachment program, where I'm gaining hands-on experience in web and software development. This opportunity allows me to apply my classroom knowledge to real-world challenges, refine my skills, and expand my professional network.

## PROJECTS

At Agri Tech, we are dedicated to revolutionizing the agricultural sector through sustainable practices and innovative technologies. Founded in 2024 by Mary Wangechi Kimaru, a Software Engineer with a deep passion for environmental sustainability and technological advancement in farming, Agri Tech aims to empower farmers and agricultural enthusiasts to adopt eco-friendly practices that benefit both the planet and their yields.
Driven by the challenges faced by the agricultural community, including climate change, soil degradation, and the need for higher productivity,I envisioned a platform that not only educates but also provides practical solutions. Agri Tech is the culmination of years of research, hands-on experience, and the belief that technology and nature can work together harmoniously.
Our mission is to create a sustainable farming future by promoting practices that enhance soil health, conserve water, and reduce the reliance on chemical pesticides and fertilizers. Through our website, we share insights on organic farming, precision agriculture, and the latest in agritech innovations, from drone farming to smart irrigation systems.
